

Project Summary

My site is a personal site. The purpose of my site is to display my resume and projects in a clean way. I also wanted to be able to showcase the actual projects associated with each description that I provide in my resume. I accomplished these goals using JS and JQuery plugins and iframes.

- <https://accordion.js.org/>
 - Plugin to make the accordion style menu on the experiences page
- <https://joaopereirawd.github.io/animatedModal.js/>
 - Plugin to make the modals and their animations when they open on the projects page
- <https://dixonandmoe.com/rellax/>
 - Plugin for the parallel scrolling for the headers of the pages
